Chance Williams – Senior Full Stack Developer

Acworth, GA 30102 | chancewilliams171@gmail.com | (404) 368-0865

Professional Summary

Versatile and results-driven Senior Full Stack Developer with over 10 years of experience architecting, building, and optimizing web applications and APIs. Proven ability to lead cross-functional teams, modernize legacy systems, and deliver robust full stack solutions using JavaScript (Node.js, React), .NET Core, SQL/NoSQL databases, and cloud services (AWS). Strong background in UI/UX consistency, backend performance, and API scalability.

Professional Experience

Senior Full Stack Developer

Upstart – Atlanta, GA | April 2022 – April 2025

- Delivered scalable features for automotive dealership software across web and iOS platforms.
- Engineered a centralized session-sharing mechanism enabling unified login across all front-end applications.
- Led the development of a reusable component library, significantly improving UI/UX consistency.
- Tech Stack: Node.js, React.js, React Native, PostgreSQL, REST APIs

Senior Software Developer

Paya – Atlanta, GA | March 2021 – April 2022

- Modernized legacy systems and contributed to scalable payment solutions using full stack technologies.
- Directed the migration of critical API services to AWS Lambda, improving scalability and performance.
- Tech Stack: Node.js, .NET Core, React, AWS, API Gateway

Full Stack Web Development Instructor

NuCamp Coding Bootcamp – Atlanta, GA | August 2020 – April 2022

- Mentored students through full stack curriculum including Node.js, React, MongoDB, Express, HTML/CSS.
- Facilitated portfolio development, ensuring practical application of complex technical concepts.

Full Stack Web Developer

Pull-A-Part, LLC – Atlanta, GA | March 2020 – March 2021

- Developed internal and external applications for sales, customer engagement, and operational efficiency.
- Contributed across the stack using .NET Core, Node.js, and multiple frontend frameworks including React and Vue.

Full Stack Developer

Profisee – Alpharetta, GA | May 2016 – March 2020

- Led the integration of data management APIs into .NET web controls for client-facing applications.
- Extended public REST and SOAP APIs; built SDK modules supporting customizable data workflows.

Software Developer

J.P. Turner – Atlanta, GA | December 2014 – May 2016

- Designed and maintained enterprise software systems and databases to support company operations.

.NET Software Developer Intern

Amazon Fabric.com – Kennesaw, GA | October 2013 – December 2014

- Implemented business logic enhancements for ecommerce features and automated regression testing via Selenium.

Education

Bachelor of Science in Computer Science

Kennesaw State University, Kennesaw, GA – 2015

Technical Skills

- Languages: JavaScript, C#, Python, SQL
- Frameworks: Node.js, React.js, .NET Core, Express.js, Angular, Vue
- Databases: PostgreSQL, MongoDB, SQL Server
- DevOps/Cloud: AWS Lambda, API Gateway, CI/CD
- Tools: Git, Docker, Selenium, REST/SOAP APIs, Entity Framework, MVC

Military Service

United States Marine Corps

Sergeant, Radio Operator (2006 – 2012)

- Operated and maintained complex communication systems in both combat and training environments.
- Provided secure and reliable voice and data transmissions during critical military operations.

- Trained and supervised junior Marines in the setup, troubleshooting, and operation of radio communication equipment.
- Demonstrated precision, discipline, and accountability under pressure, traits carried into technical leadership roles.
